

Libertà assoluta, spazialità assoluta, creatività assoluta. / Absolute freedom, absolute spatiality, absolute creativity.

La possibilità di portare la luce ovunque, liberamente.

The possibility to take light anywhere, freely.

La tecnologia aiuta a cancellare i confini.

Technology helps to break down the boundaries.

Materiali impalpabili, talvolta invisibili, conduttori nascosti, travestiti, ragnatele sottili di filamenti che conducono e disegnano la luce.

Intangible, almost invisible materials, hidden, camouflages conductors, thin cobwebs of filaments that carry and draw the light.

Luce che corre su binari digitali, su fili leggeri e quasi invisibili, su nastri modulabili che possono posarsi su scale, finestre, vetrate, senza più limiti.

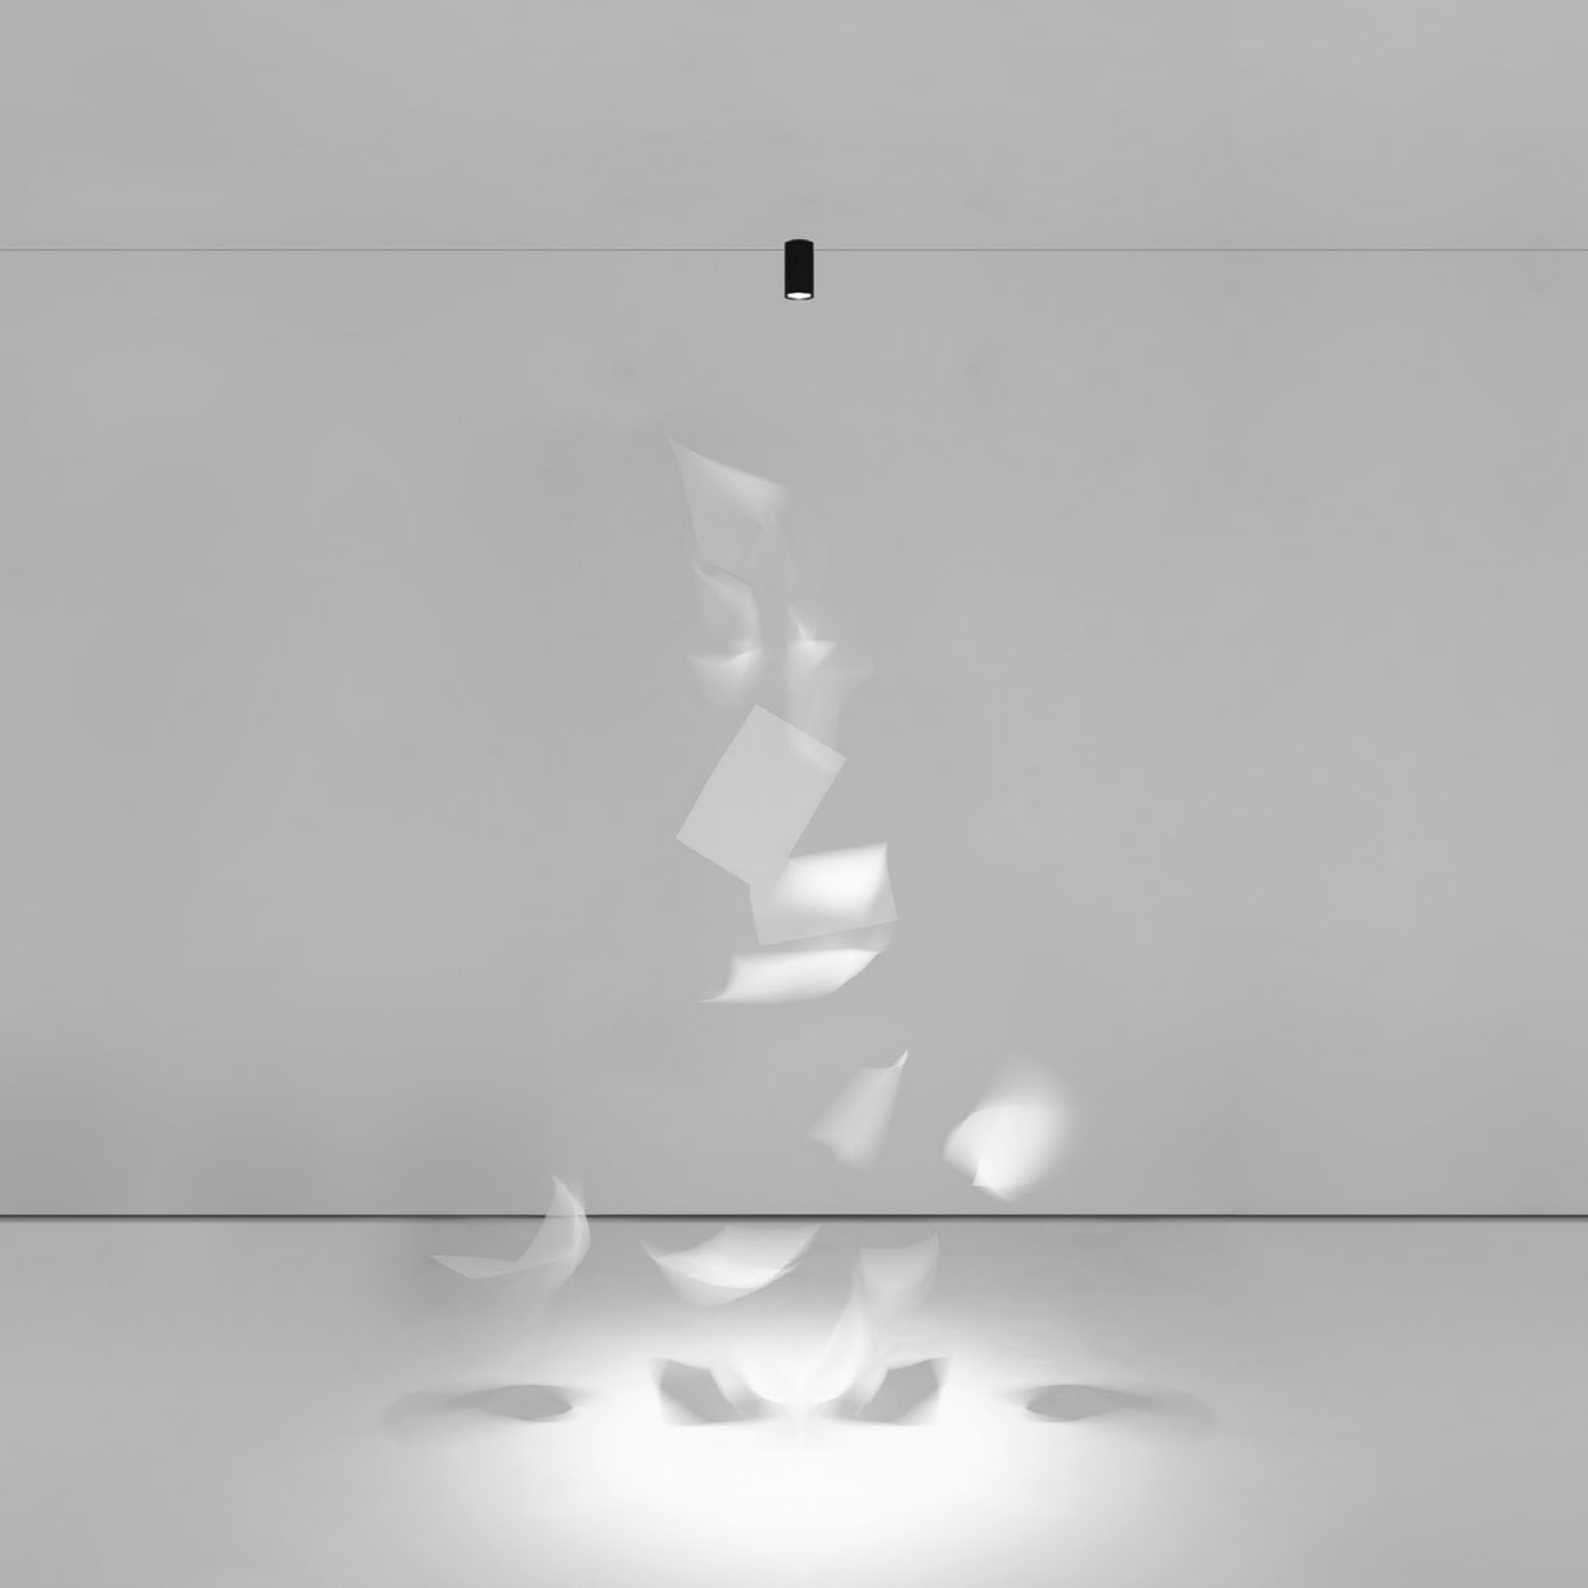

Light running on digital tracks, ultra-light and almost invisible wires, modular tapes that can be laid limitlessly on stairs, windows, glass panels.

Circuiti che si chiudono, luci d'accento, diodi leggerissimi.

Circuit that close, accent lighting, ultra-light diodes.

Tutto questo è **Sistemi**, una struttura che integra quattro diversi progetti, modulabili e compatibili tra loro.

All this is **Sistemi**, a structure integrating four different, modular and compatible designs.

La luce corre sul filo.

Un filo quasi impercettibile, sospeso nello spazio.

Come un funambolo su una corda sottilissima,
la luce arriva ovunque, con leggerezza ed emozione.

Ohm è un progetto elettromeccanico, che sfrutta al massimo le
caratteristiche dei diodi luminosi. Un omaggio al grande scienziato
tedesco Georg Simon Ohm e ai principi fondamentali dell'elettricità.

Il segreto di Ohm è uno speciale cavo unipolare tirato da parete a
parete. La fonte quasi si nasconde, impalpabile e discreta.

Ohm disegna lo spazio, crea ragnatele quasi invisibili
che sostengono i diodi, fonti di luce puntuale, minuscole sorgenti
sospese in uno spazio vibrante.

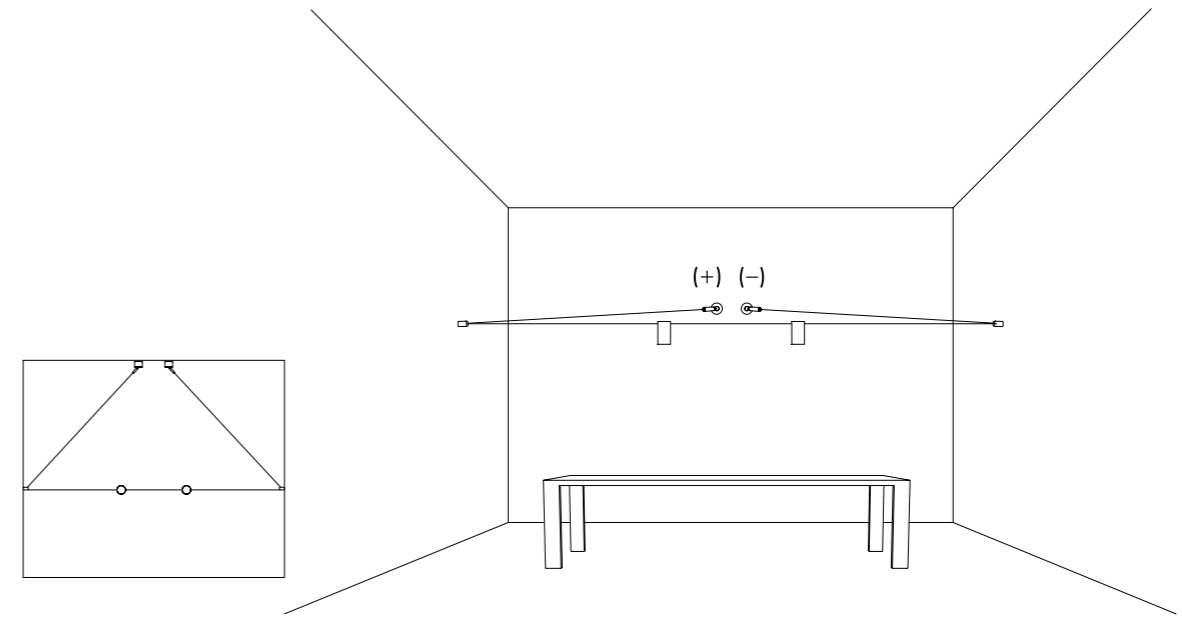

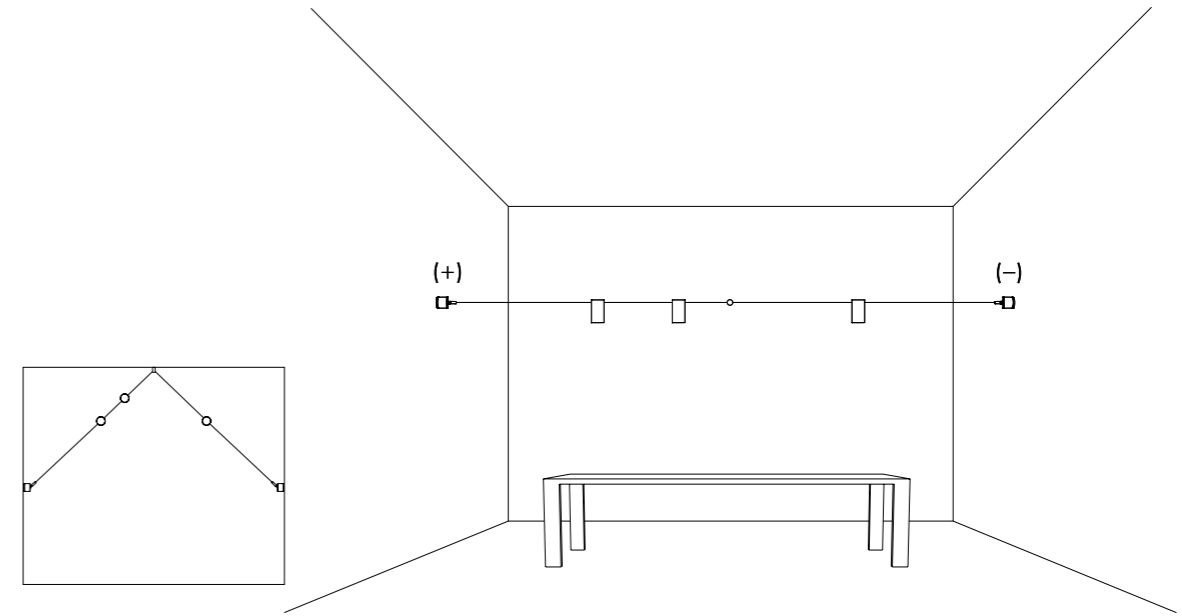

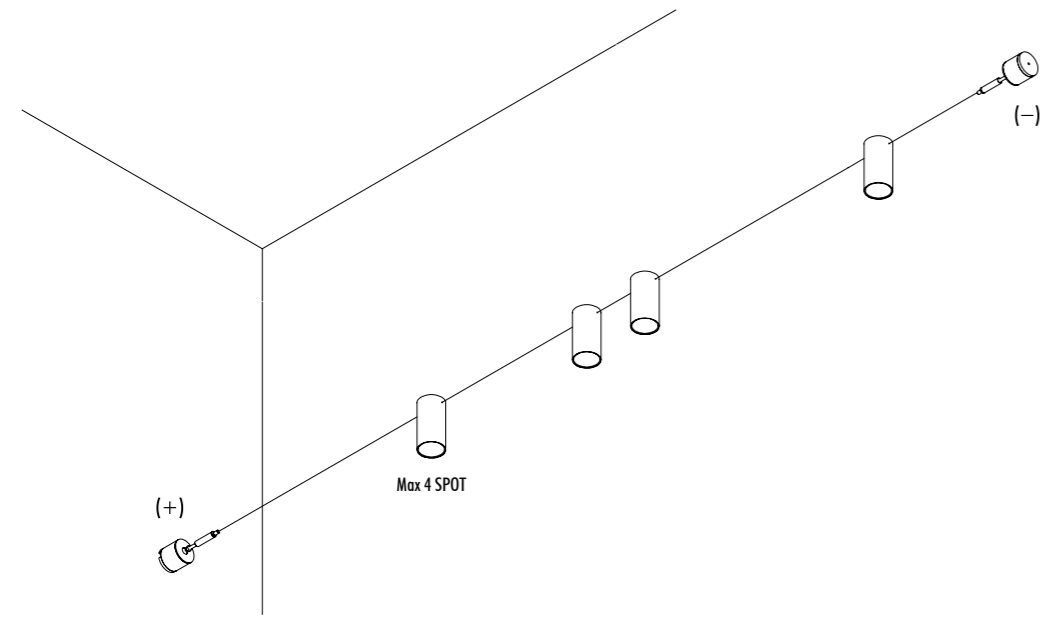

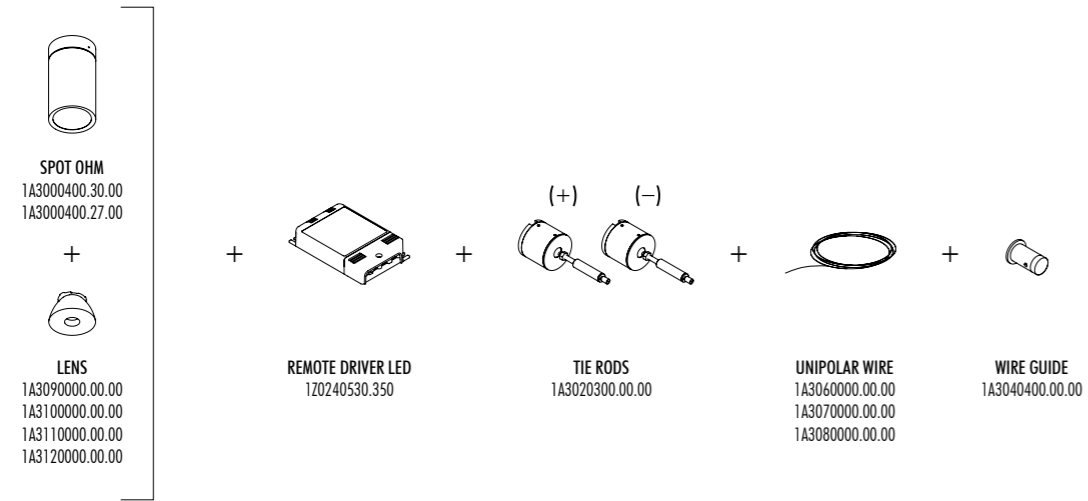

Light runs on a wire.

An almost imperceptible wire, suspended in space.

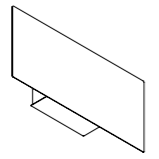

Like a tightrope walker on an ultra-thin wire,
the light reaches everywhere, thrilling and impalpable.

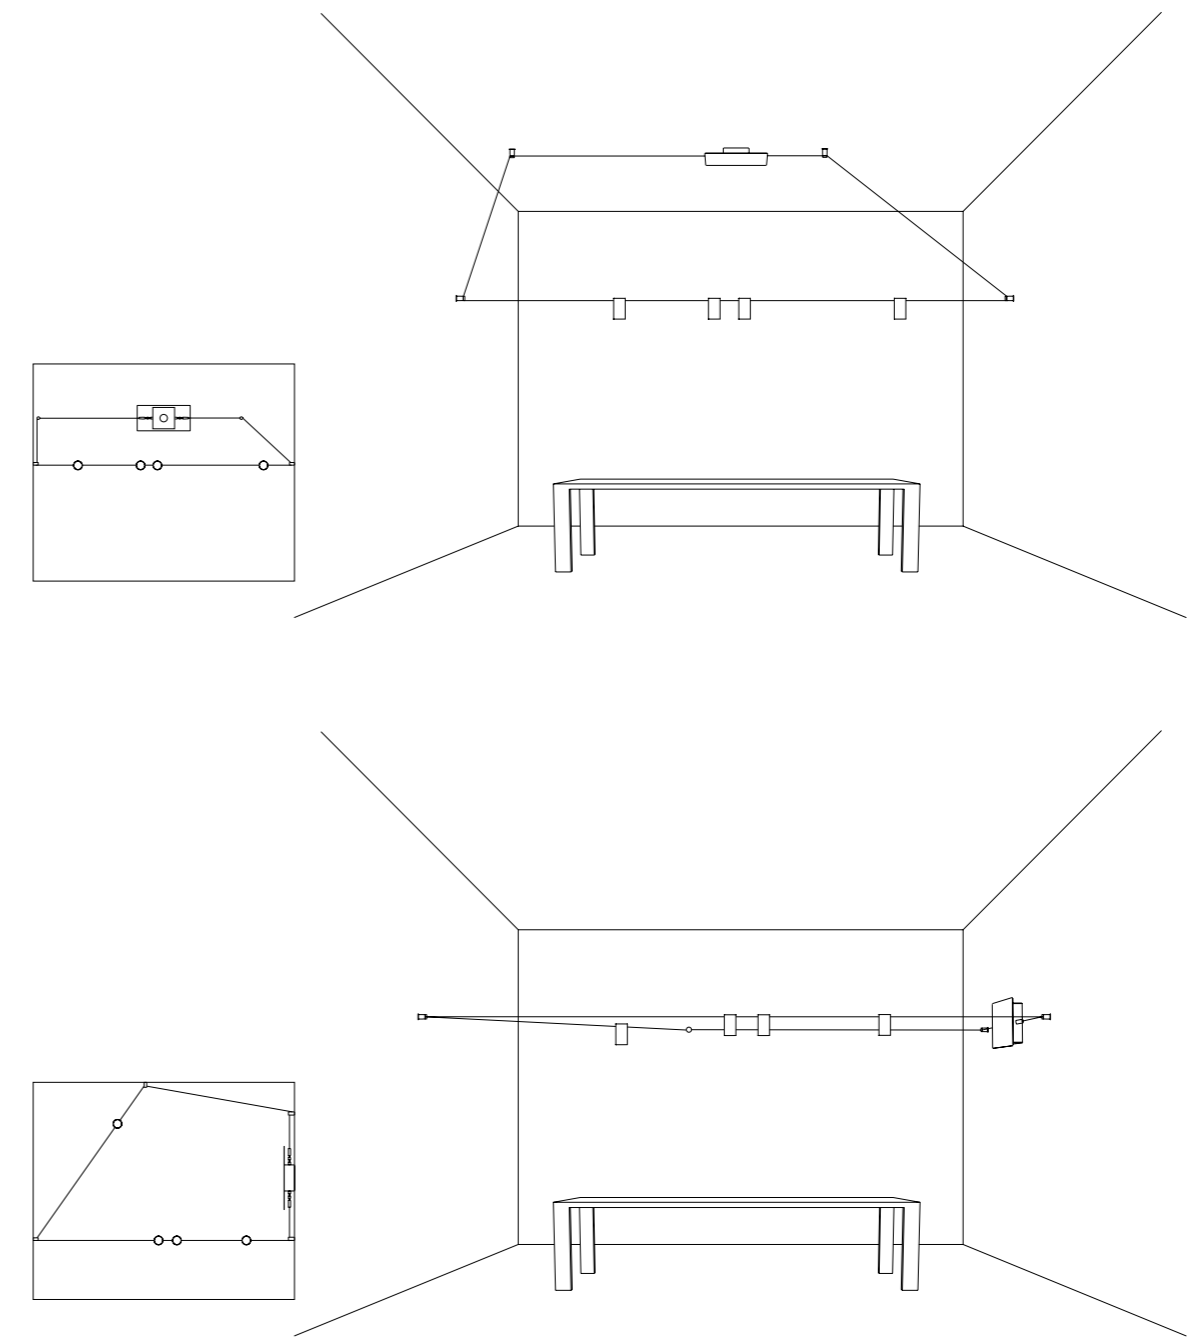

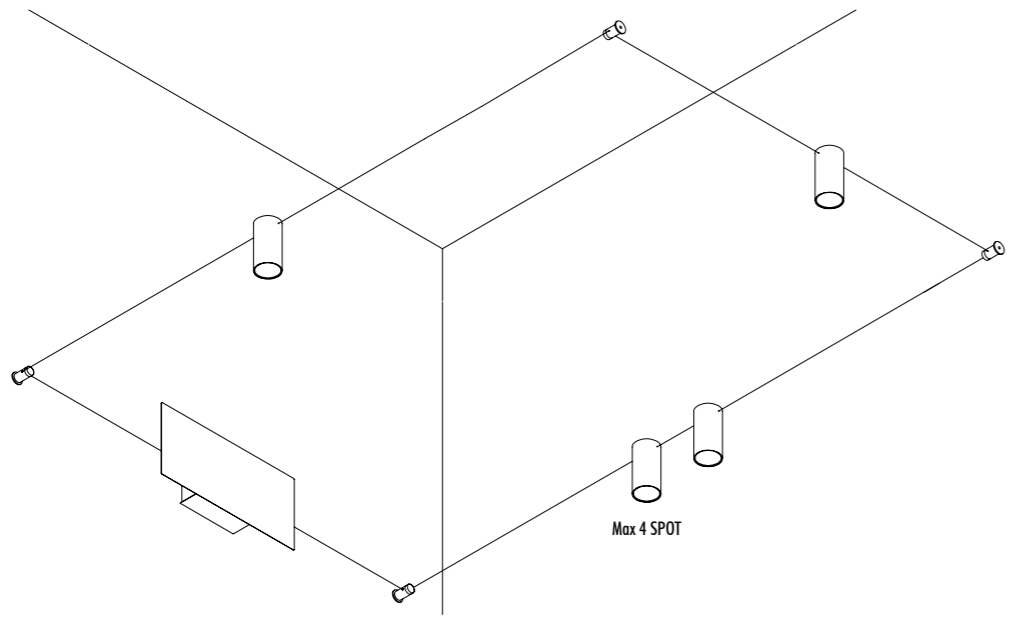

Ohm is an electro-mechanical project that exploits the characteristics
of light-emitting diodes to the full. It pays homage to the great German
scientist Georg Simon Ohm and to the fundamental principles of
electricity. Ohm's secret is a special single-pole cable running between
two walls. The source is practically hidden, discreet and intangible.

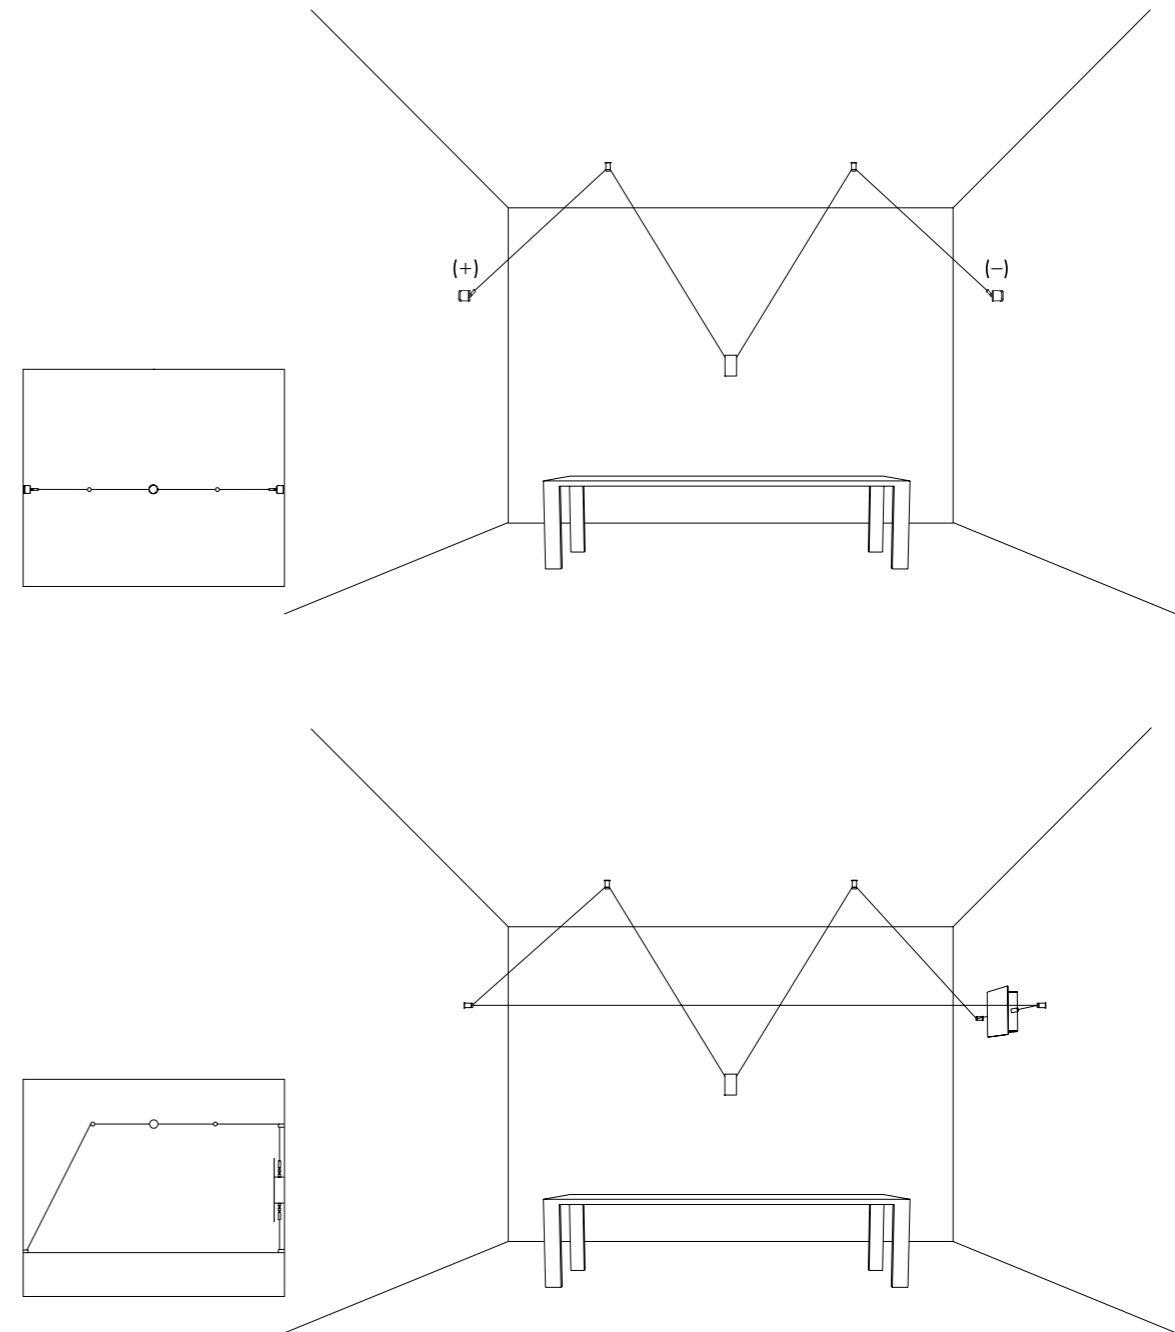

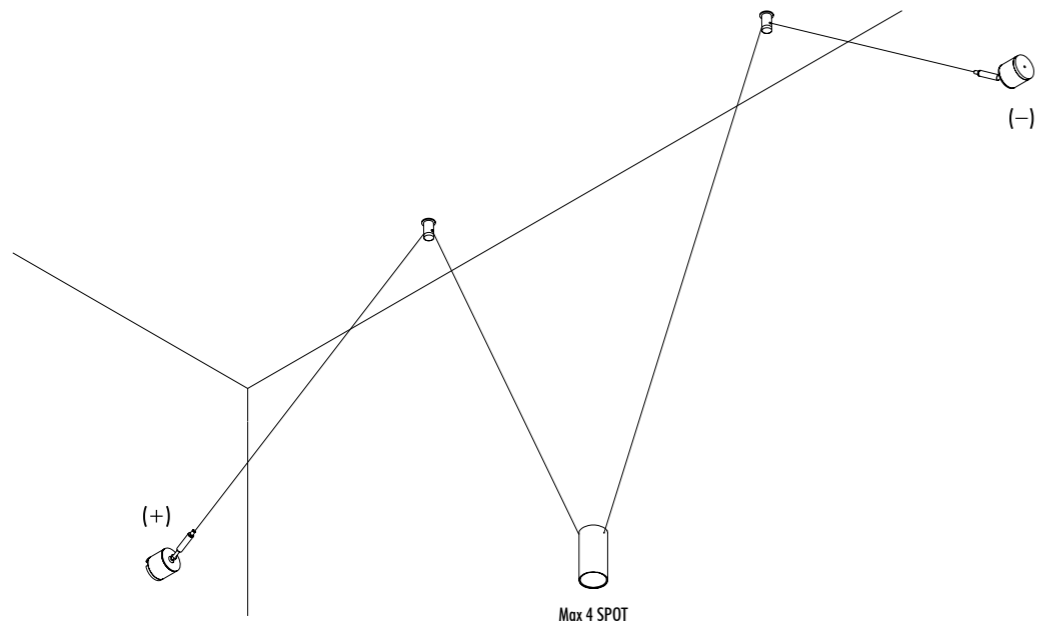

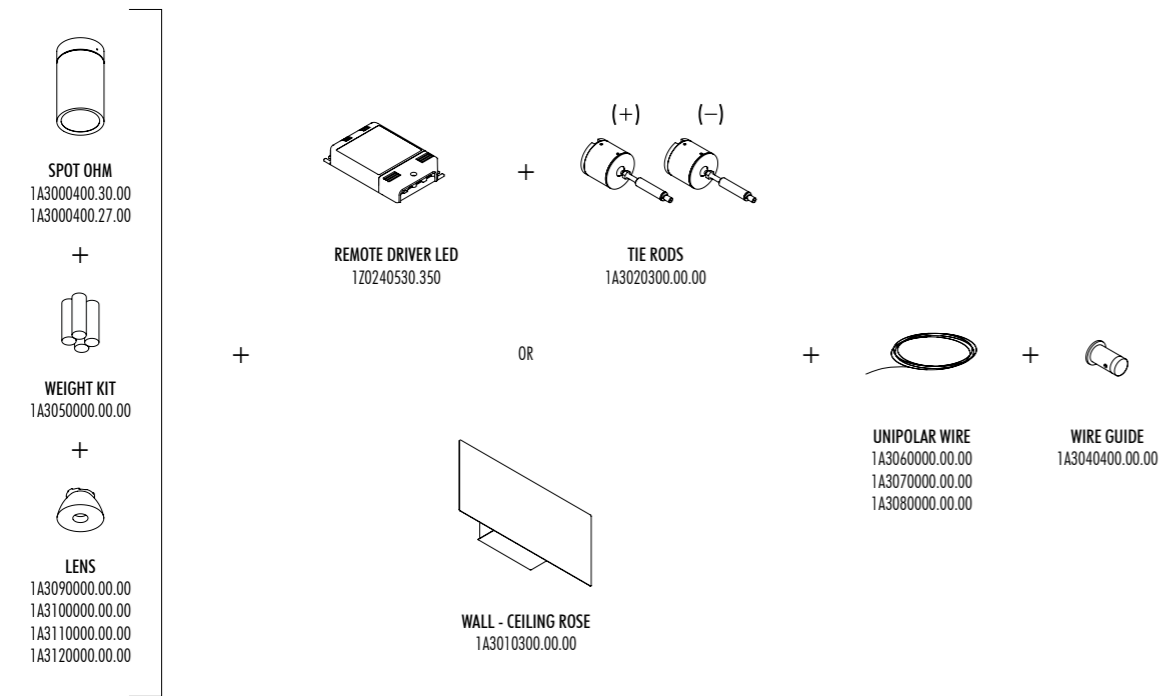

Ohm draws the space, creating almost invisible cobwebs that support
the diodes, sources of projected light, tiny light sources suspended in a
vibrating space.
